## Errata

In JPMA volume 50. No. 10. Page 360 - 361. Case Report titled "Aplastic Anemia in a Patient with Factor IX Deficiency," the first paragraph under "Discussion" should be corrected to read as follows: "The patient had typical Features of HAAA. The double hemostatic defect, congenital and acquired . caused increase in bleeding episodes and also bleeding in sensitive body areas. HAAA is believed to be an immune-mediated disorder and an imbalance of lymphocyte sub-population (Helper! Suppressor) and T lymphocyte (CD 8+) activation has been found to have pathogenetic role 4."
