

# **ETIOLOGICAL STUDY OF CHRONIC OSTEOMYELITIS IN KARACHI**

Pages with reference to book, From 149 To 149

Two errors occurred in the text in this Letter to the Editor by Syed Iqbal Alam, Khurshed Ali Khan, Ali Mohammad Ansari and Aqeel Ahmad (January 1991, p. 24). In line 3, of 80 cases reported, staphylococcus aureus was the commonest infecting organism (37.5%) and not E. Coli, In line 14, staphylococcus aureus was the single commonest infecting organism (68.6%) and not E. Coil.
